

STANDARD OPERATING PROCEDURE

Title: Equipment Lubrication Procedure

Document ID: SOP-LUB-001

Purpose

To maintain proper lubrication and reduce wear.

Procedure

1. Verify lubricant type.
2. Inspect contamination.
3. Remove old grease.
4. Apply specified lubricant quantity.
5. Verify grease distribution.
6. Record lubrication activity.

Failure Indicators

- Metal contamination
- Grease discoloration
- Elevated bearing temperature

Benefits

- Reduced wear
- Lower vibration
- Extended asset life
